Hello everyone,

If the planned facility will not discharge to a surface water, it's possible that an NPDES permit from EPA for wastewater would not be required.

For construction of the facility, coverage under the NDPEs construction general permit (CGP) could be required. The CGP number is OKR10I000 - Indian country within the State of Oklahoma.

Brent Larsen (added to this email) is the Section Chief in the Region 6 Water Division for the group of folks who write wastewater permits for facilities on Tribal lands and are the lead for the CGP. Either Brent or someone in his section can best address any questions about the facility.

Thank you,

Diane Evans

Hi Golam. Sure I'd be happy to help. My program works with recycling and municipal solid waste with tribes and this looks like it would be handled in our Water Division so I'll cc Diane Evans on this email. Hi Diane, can you help Mr. Streebin with his request? Thanks and please let me know if I can be of any further assistance.

Hi Roger,

Today, we received the attached request from Perry Streebin, P.E., *Search, LLC*, Norman, OK.

See attached below.

Can you coordinate with Perry and answer his questions.

Best Regards,
Golam

Subject: Muscogee (Creek) Nation - Oklahoma - Meat Packing Facility Wastewater Treatment Facility.

Mr. Mustafa,

The Creek Nation is constructing a small meat processing and packing facility on Trust Property in Okmulgee Co., OK. There will be an aerated wastewater treatment facility, storage, and evaporations lagoons, and an effluent irrigations system as part of this facility. This will be a non-discharging system designed following the Oklahoma Department of Environmental quality standards.

We are looking for the EPA Region 6 contact for tribal facilities in Oklahoma. Please forward this email to the person over the correct section.

Thank you,

Perry Streebin, P.E.
